Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 February 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

This action is in response to the request for re-consideration filed on 2/23/05.

Arguments are moot because new grounds of rejection have been introduced.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-15 are rejected under 35 U.S.C 101 because they disclose a claimed invention that is an abstract idea as defined in the case *In re Warmerdam* 33, F3d 1354, 31 USPQ2d 1754 (Fed. Cir. 1994).

Analysis: In claims 1-15 the invention is found to be in technological art since the invention is to be practice by using a computer. Since the claims are each a series of steps to be performed the process must be analyzed to determine whether they are statutory under 35 USC 101.

Examiner believes that the claims are nonstatutory because that are not new and claims involves no more than a manipulation of an abstract idea by dividing processes and normalizing group of algorithm. Claims are not capable of producing a useful result when they are fixed in a tangible medium to its functionality can be realized. Therefore, claims 1-15 are nonstatutory and rejected under 35 USC 101.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2193

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by *Pastor et al* USPN 6,681,383.

Regarding claims 1 and 15

Pastor et al teaches,

dividing software processes with familiar functional domains into normalized groups of algorithms (column 3, lines 25-45);

encapsulating groups with multi-modal metaphors (column 4, lines 5-22), and

constructing multi-modal unified configuration mechanisms within each domain of groups (column 8, lines 1-45).

Art Unit: 2193

Regarding claims 2-4 and 9-13

Pastor et al teaches,

binding the system together with a scripting system (column 8, lines 46-54).

Regarding claim 5

Pastor et al teaches,

the information is monitored and controlled in an information phase model comprising solid, liquid and gaseous phases (column 26, lines 1-25).

Regarding claim 6

Pastor et al teaches,

the information is monitored and controlled in synchronous and/or asynchronous operations (column 6, lines 1-42).

Regarding claims 7 and 8

Pastor et al teaches,

Utilizing system service tools on the information (column 7, lines 23-45 and column 8, lines 11-45).

Regarding claim 14

Pastor et al teaches,

The tool is an equation processor (column 18, lines 53-65 and column 19, lines 1-38).
